W06-P2: Show 2 blogs with media query min-width: 550px

d6daf0b cdchiang Sat Oct 19 22:24:48 2024 +0800 W06-P2: Show 2 blogs with media query m:

W06-P3: Show 3 blogs with media query min-width: 800px

## W06-P4: Show 4-6 blogs in a row with media query. You need to determine the min-width for each.

=> 4 blogs in a row

The screenshot displays a web development environment with a code editor on the left and a browser preview on the right.

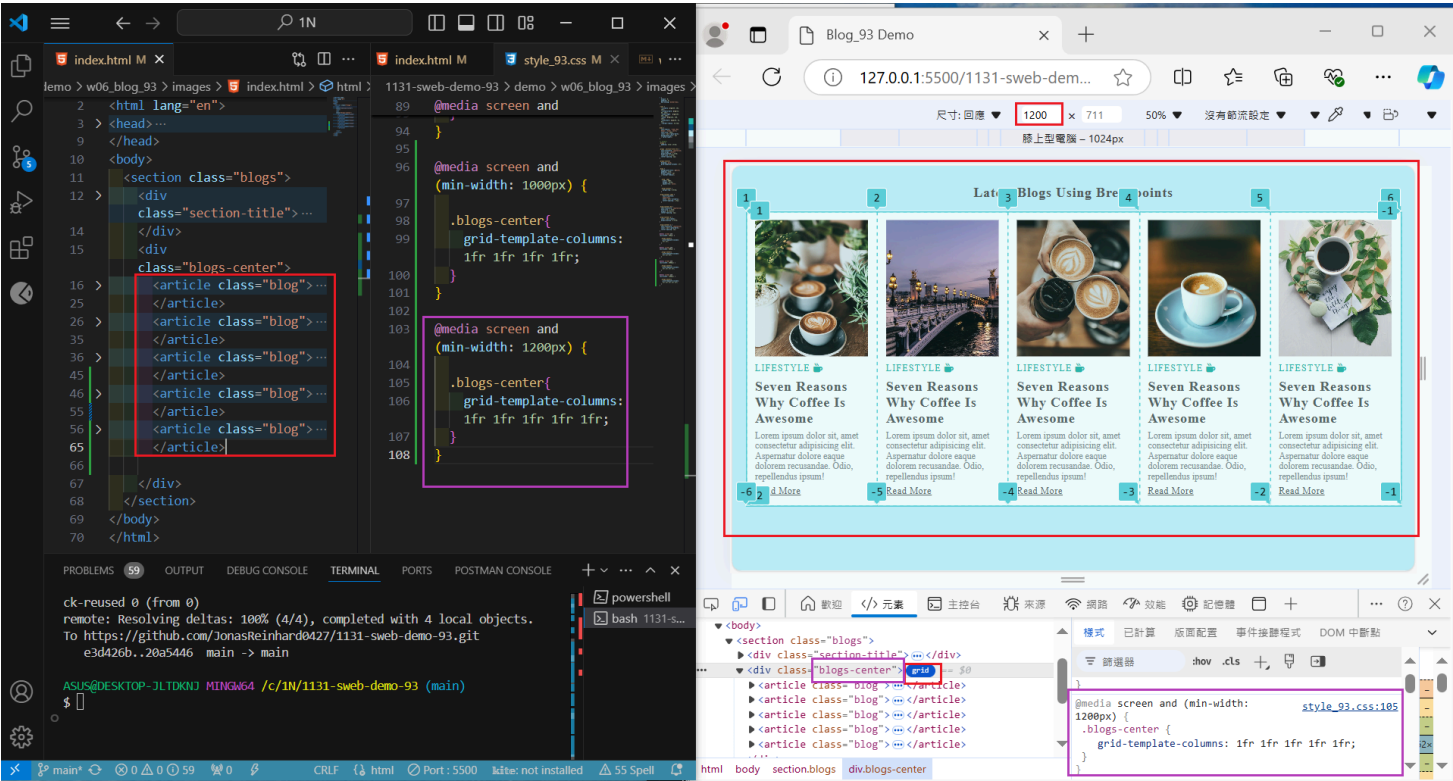

**Code Editor:**

- index.html:** Shows a section with the class "blogs" containing a div with the class "blogs-center". Inside "blogs-center", there are four article elements, each with the class "blog".
- style\_93.css:** Contains media queries for the "blogs-center" class. The first query is for a screen and a minimum width of 1000px, setting the grid-template-columns to "1fr 1fr 1fr 1fr". The second query is for a screen and a minimum width of 800px, setting the grid-template-columns to "1fr 1fr 1fr".

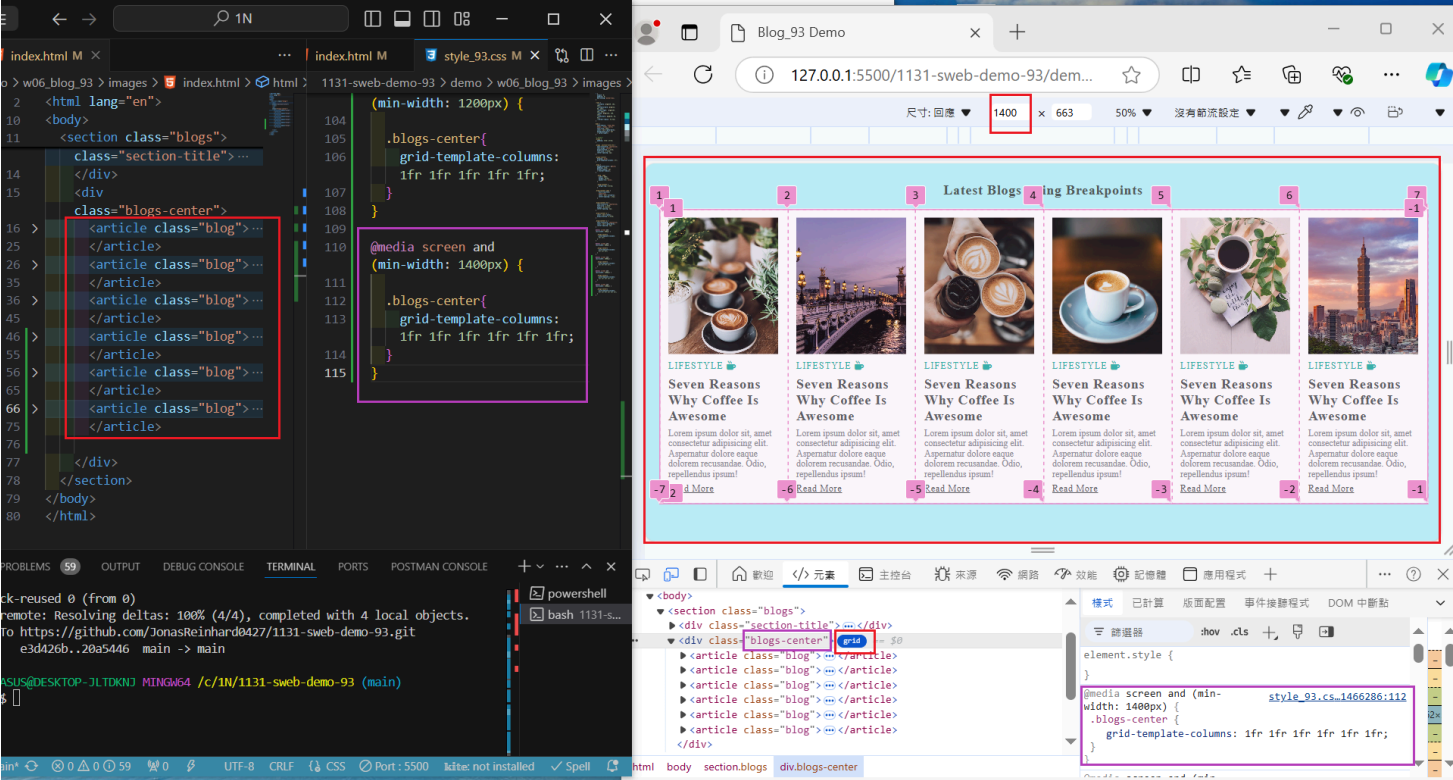

**Browser Preview:**

- The browser shows the "Blog\_93 Demo" at the address 127.0.0.1:5500/1131-sweb-de... with a resolution of 1000 x 604 and 62% zoom.
- The page displays a section titled "Latest Blogs Using Breakpoints" with four blog cards arranged in a row.
- The browser's developer tools are open, showing the DOM tree and the CSS styles for the "blogs-center" class. The media query for a minimum width of 1000px is highlighted, showing the grid-template-columns: "1fr 1fr 1fr 1fr".

=> 5 blogs in a row

=> 6 blogs in a row
