      element.style {
        position: fixed;
        top: 0;
        left: 0;
        width: 100%;
        background-color: var(--grey-100);
        box-shadow: var(--shadow-1);
        z-index: 2;
      }
    }
    .nav {
      position: fixed;
    }

```

=> select p1_93 nav link, navbar-fixed will be removed

The screenshot shows a web browser window with a landing page. The page has a header with the text "Midterm Cdchiang, 213410193" and three navigation links: "P1_93", "P2_93", and "P3_93". Below the header are four cards, each with a title and a "Sign In" button. The second card from the left is highlighted with a red border. The browser's developer tools are open, specifically the DOM and CSS panels, which show the structure of the "nav" element and its styling.

=> select p2_93 nav link, navbar-fixed will be displayed

This screenshot is similar to the one above, but the second navigation link "P2_93" is highlighted with a red border. The rest of the page content and developer tools are identical.
